

CHILDREN IN FINANCIAL HARDSHIP: PENNSYLVANIA

The number of children living in financially insecure households in Pennsylvania continues to be systematically undercounted. According to the outdated Federal Poverty Level (FPL), 16% of children in Pennsylvania (404,580) lived in poverty in 2022. Yet [United For ALICE](#) data shows that another 31% (796,571) — nearly twice as many — were also growing up in financial hardship. These children live in households that are **ALICE**[®]: **A**sset Limited, **I**ncome **C**onstrained, **E**mployed, earning above the FPL but not enough to afford the basics in their communities.

With poverty-level and ALICE households combined, a substantial **46%* of the 2.6 million children in Pennsylvania lived in a household with income below the [ALICE Threshold of Financial Survival](#) in 2022**, ranking Pennsylvania 22nd among all states and the District of Columbia (with 1st representing the lowest rate of children living in financial hardship). These households don't earn enough to afford housing, child care, food, transportation, health care, technology, and taxes — the basics needed to live and work in the current economy.

Children by Household Income, Pennsylvania, 2022

Total Number of Children in Pennsylvania = 2,605,028

* In Pennsylvania, out of 2,605,028 children, there were 404,580 (15.5%) in poverty plus 796,571 (30.6%) were ALICE, which totals to 1,201,151 (46.1%) below the ALICE Threshold and rounds to 46% in this Brief.

Note: This research uses the U.S. Census Bureau's American Community Survey [Public Use Microdata Sample](#) (PUMS) and focuses on children, whose ALICE status is determined by their household's income compared to local cost of living. ALICE analysis includes households regardless of work status, as employment is fluid and most households have members who are working, have worked, are on disability, or are looking for work. This analysis does not include children who are unhoused or living in group quarters. In this Brief, percentages are rounded to whole numbers for ease of reading, which may result in percentages totaling 99% or 101%. All numbers are presented in the [ALICE Children Data Dashboard](#).

Sources: ALICE Threshold, 2022; U.S. Census Bureau, American Community Survey, PUMS, 2022

KEY FINDINGS 2022

- Nearly half (46%) of children in Pennsylvania lived in households experiencing financial hardship. While 16% were below the FPL, an additional 31% were ALICE.
- There were disparities by race/ethnicity due to systemic barriers to financial stability. For example, 71% of Black children and 68% of Hispanic children in Pennsylvania lived in households with income below the ALICE Threshold, compared to 36% of White children.
- Having working adults in the household did not guarantee financial stability: 30% of Pennsylvania children in households with two adults in the labor force were still below the ALICE Threshold.
- Children below the ALICE Threshold often lacked access to crucial resources. Just under 662,600 children below the Threshold in Pennsylvania did not participate in SNAP, and nearly 260,900 had no high-speed internet access at home.

Since the first *ALICE in Focus: Children* brief (2019 data), the conflicting economic and social forces of the COVID-19 pandemic — inflation, wage growth, and the expansion and expiration of [pandemic public assistance](#) (especially relevant for households with children) — have impacted children and their families in various ways. As shown in our 2023 [ALICE in the Crosscurrents](#) Report, the situation for households below the ALICE Threshold improved in some respects and worsened in others, over the course of the pandemic and during its aftermath.

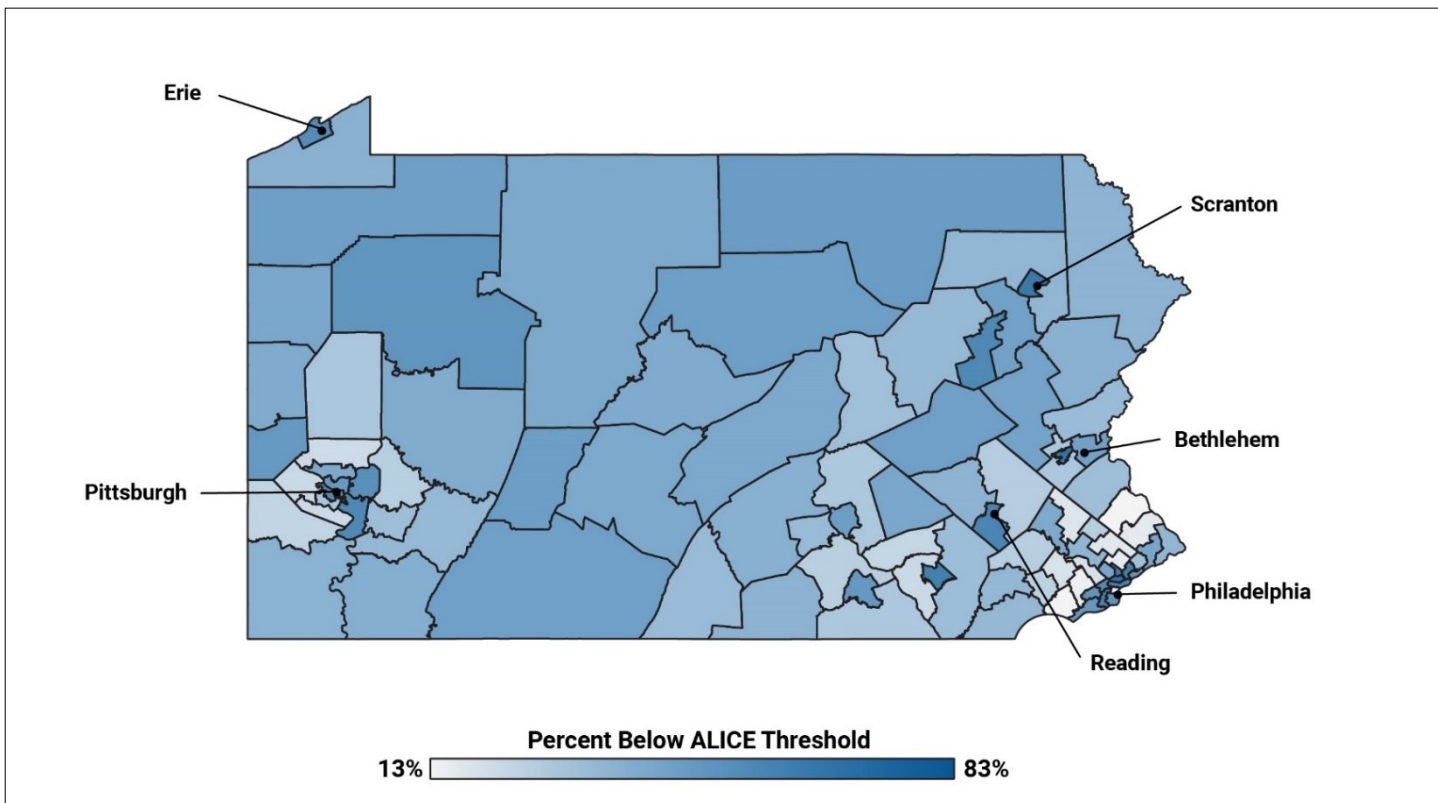

Amid these substantial shifts, the share of children living in financially insecure households has increased at the state level. In 2019, 43% (1,134,801) of children in Pennsylvania were below the ALICE Threshold. By 2022, the share and number of these children increased to 46% of children in the state (1,201,151).

There are children below the ALICE Threshold in [communities across the state](#) ([Public Use Microdata Areas](#), or PUMAs), at rates ranging from 83% in Philadelphia (North) to 11% in Bucks County (Northern Central). [Visit the ALICE Children Data Dashboard to see additional data \(for 2019 and 2022\) and an interactive version of the state map.](#)

TERMS AND DEFINITIONS

- **ALICE:** Asset Limited, Income Constrained, Employed — households that earn above the Federal Poverty Level (FPL) but cannot afford the basic cost of living in their county. Despite struggling to make ends meet, ALICE families often do not qualify for public assistance.
- **ALICE Household Survival Budget:** The minimum cost of household necessities (housing, child care, food, transportation, health care, and technology), plus taxes, adjusted for different counties and household types. While the FPL for a family of four in Pennsylvania in 2022 was \$27,750, the average bare-minimum cost of living for that family was \$83,700.
- **ALICE Threshold:** Derived from the Household Survival Budget, the minimum average income that a household needs to afford basic costs. Children **below the ALICE Threshold** include those in poverty-level and ALICE households combined.

Percentage of Children Below ALICE Threshold by PUMA, Pennsylvania, 2022

Sources: ALICE Threshold, 2022; U.S. Census Bureau, American Community Survey, PUMS, 2022

WHO ARE CHILDREN BELOW THE ALICE THRESHOLD?

A child's start in life impacts their long-term health, wellness, education, and career. Family financial stability is one of the strongest [predictors of current and future well-being](#). Financial instability not only contributes to daily experiences of [stress, trauma, and hardship](#) in the present, but it impedes a child's opportunity for [future success](#), including higher education, a higher income, and long-term asset building.

Children below the ALICE Threshold in Pennsylvania are those under age 18 living in households with income below the basic cost of living for their community. Children in Pennsylvania's financially insecure households are from all locations and demographic groups; are of all ages; are born in the U.S. or abroad; are of all abilities; are of all races/ethnicities; and live with parents or guardians who are married or single, working or not working, and English-speaking or non-English-speaking.

Demographics

The largest numbers of children below the ALICE Threshold were found in the state's largest demographic groups. Yet the rate of hardship ranged substantially across groups. **In Pennsylvania in 2022:**

Age: There were 196,950 infants/toddlers (age 0–2 years), 142,837 preschoolers (3–4 years), and 861,364 school-age children (5–17 years) living in households

below the ALICE Threshold. The rates of financial hardship were higher for infants/toddlers (51%) and preschool-age children (52%) than for school-age children (44%).

Race/ethnicity: By number, children below the ALICE Threshold were predominantly White (590,982), Hispanic (249,983), and Black (211,431). Yet due to [persistent discrimination and systemic barriers to financial stability](#), the share of children below the Threshold was higher for some groups: 71% of Black children, 68% of Hispanic children, 68% of American Indian/Alaska Native children, 48% of children of Two or More Races, 40% of Asian children, and 36% of White children were growing up in financial hardship.

Disability status: Children with a disability were more likely to live in households below the ALICE Threshold (63%) than those without a disability (45%). The percentage of children below the Threshold was also higher when anyone in the household had a disability (62%) or when a parent or guardian had a disability (65%).

Nativity and language: Of the 62,693 children in Pennsylvania who were born outside the U.S. (2% of children in the state), 67% were below the ALICE Threshold, compared to 46% of those born in the U.S. Rates were even higher for the 102,823 children living in a family with limited English-speaking ability (4% of children in the state), with 79% below the Threshold.

ALICE CHILDREN DATA DASHBOARD

The ALICE Children Data Dashboard includes interactive data on children living in hardship by:

- State, regional, and local geographies
- Demographic categories including children's age, race/ethnicity, disability, and nativity
- Household characteristics
- Children's access to key resources
- Data year (toggle between 2019 and 2022 for all variables)

Household Characteristics

Most children in Pennsylvania live with at least one of their parents (biological or adoptive). Children may live with married or unmarried parents, single parents, grandparents, or guardians. Household composition — especially the number of working adults — has a substantial impact on children’s financial stability.

In Pennsylvania in 2022:

Living arrangements: The largest number of children below the ALICE Threshold were in married-couple households (576,764), followed by single-female-headed households (417,825). But the percentage of children below the Threshold varied by adults’ marital status and partnership type: 33% of children in all married-parent households (33% for different-sex and 24% for same-sex couples), 56% of children in single-male-headed households, 62% of children in unmarried-couple households, and 80% of children in single-female-headed households were growing up in hardship.

- **Children living with grandparents:** 12% of all Pennsylvania children (302,148) lived in a home with a grandparent, which included both multi-generational households and households where

grandparents were raising grandchildren on their own. More than half (56%) of children in these households were below the ALICE Threshold.

Household work status: Most children (95%) lived in a household with at least one worker. As the number of workers in the family increased, the share of children below the ALICE Threshold decreased. In Pennsylvania, 77% of children living with one adult who was working were below the Threshold; with two adults, one of them working, 62% were below the Threshold; and with two adults who were both working, 26% were below the Threshold. Among all families with two or more adults, two of whom were working, nearly a third (30%) of children were still below the Threshold in 2022, demonstrating that having working adults in the household does not guarantee financial stability.

While parents and guardians work in every sector, children below the ALICE Threshold are concentrated in families where adults work in occupations with low median hourly wages. These include some of the most common occupations in the state: For example, 51% of Pennsylvania children with an adult working as a retail salesperson, earning a median wage of \$13.97 per hour, were below the Threshold in 2022.

Children by Household Financial Status and Household Characteristics, Pennsylvania, 2022

	TOTAL	BELOW ALICE THRESHOLD	POVERTY	ALICE	ABOVE ALICE THRESHOLD
ALL CHILDREN	2,605,028	1,201,151	16%	31%	54%
LIVING ARRANGEMENTS					
Grandparent Living With Grandchild	302,148	169,206	16%	40%	44%
Married-Couple Household	1,737,054	576,764	7%	27%	67%
Single-Female-Headed Household	524,253	417,825	38%	41%	20%
Single-Male-Headed Household	126,239	71,006	14%	42%	44%
HOUSEHOLD WORK STATUS					
One Adult, One Worker	304,787	234,607	30%	47%	23%
Two Adults, One Worker	531,438	327,344	22%	40%	38%
Two Adults, Two Workers	979,289	252,198	3%	22%	74%

Note: The groups shown in this figure overlap across categories (Living Arrangements and Household Work Status). “Grandparent Living With Grandchild” includes any arrangement where grandparents live with their grandchild, including where parents or other adults are present. For the Household Work Status category, the number of workers is defined as “workers in the family over the last 12 months” from when the survey was conducted. View more on the [ALICE Children Data Dashboard](#).

INTERCONNECTED BARRIERS TO WELL-BEING

Children below the ALICE Threshold are more likely to lack stable housing, quality child care and early education, private health insurance, high-speed home internet access, and reliable food access. When basic necessities are at risk, families have to make impossible decisions — like choosing to pay for food or quality child care, for medicine or utility bills. Decisions made in one area of the budget can have both [short- and long-term consequences](#) that ripple across all other areas.

In Pennsylvania in 2022:

Housing: Children in families without stable housing face greater risks for [poor physical health, increased family stress, social isolation, and lower academic performance](#). Among children below the ALICE Threshold in Pennsylvania, 46% were in families that rented and 54% were in families that owned their home. Below the Threshold, families of Black children had the lowest homeownership rate (32%), while families of White children had the highest (68%). Above the Threshold, the homeownership rate for families of Black children was higher (65%), but still substantially lower than for families of White children (91%). Overall, 49% of children in renter households and 19% of children in homeowner households were in families that were cost burdened, paying 30% or more of household income on housing.

Education: Of all preschool-age children in Pennsylvania, 45% were enrolled in preschool, slightly lower than the national average (47%). Preschool-age children below the ALICE Threshold were less likely than their peers above the Threshold to be enrolled in preschool (37% vs. 54%). For children age 15–17, however, rates were similar, with 95% of teens below the Threshold enrolled in school compared to 96% of their peers above the Threshold.

Health insurance: Access to health insurance is critical to both [wellness and financial stability](#) for families below the ALICE Threshold, and [especially for children](#). While most children in Pennsylvania had health insurance (95%, the same as the national rate), 7% of children below the ALICE Threshold (83,863) did not have coverage. Children in families with income below the Threshold were also more likely to have public health insurance (56%), while those above the Threshold were far more likely to have private health insurance (85%).

Home internet: The availability of internet access and devices for education has become increasingly essential for young people, yet the [digital divide](#) by income and race/ethnicity persists. Most children in Pennsylvania (97%) had home internet access. However, children below the ALICE Threshold were less likely to have high-speed internet, which is essential for work and online learning (78% vs. 89%). High-speed internet rates increased for all children in Pennsylvania through the pandemic, up from 82% in 2019 to 84% in 2022. Yet nearly 260,900 children below the Threshold in Pennsylvania still did not have high-speed internet at home in 2022.

Among children below the ALICE Threshold, high-speed internet varied by race/ethnicity: 73% for Hispanic children, 76% for Asian children, 78% for Black children, and 79% for White children. By location, high-speed internet access for children below the Threshold was highest in Delaware County (West) where all of these children had access and lowest across Crawford and Warren counties, where only half of children below the Threshold had access.

Food access: Households with children living below the ALICE Threshold were more likely to have difficulty putting food on the table. According to the [U.S. Census Household Pulse Survey](#), in 2022, 23% of Pennsylvania families below the Threshold with children reported that sometimes or often “children were not eating enough because we just couldn’t afford enough food,” more than five times higher than the rate for those above the Threshold (4%).

Public assistance: For a [variety of reasons](#), public assistance does not reach all children in households that are struggling. While most children in poverty are eligible for assistance, ALICE children live in households that often earn too much to qualify. For example, the income eligibility threshold in Pennsylvania for the Supplemental Nutrition Assistance Program (SNAP) is 160% of the

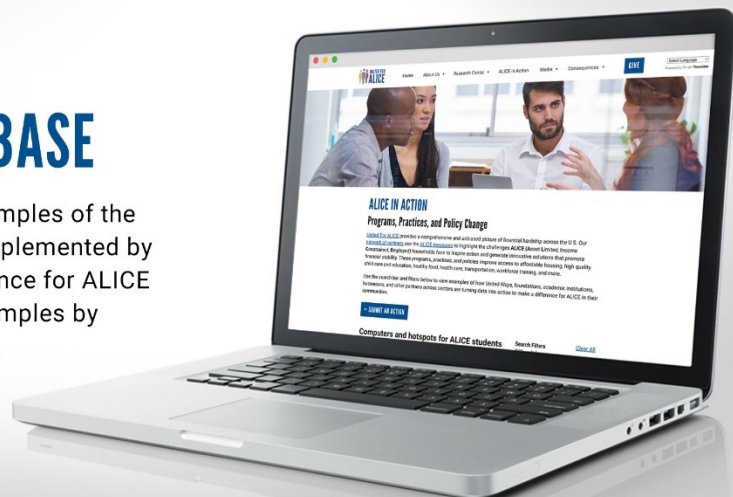

FPL. Even though all children in poverty should be covered by SNAP, in Pennsylvania the program was utilized by only 68% of children in poverty (273,754) and a mere 33% of children in ALICE households (264,803) in 2022. Of all children below the ALICE Threshold in Pennsylvania, only 45% participated. This left a gap of nearly 662,600 children whose families were struggling to make ends meet but not participating in SNAP.

Intersectionality: For some children, multiple intersecting forms of discrimination and limited access to resources make household financial instability more likely. For example, 68% of Hispanic children in Pennsylvania were below the ALICE Threshold in 2022. For Hispanic children with a disability, the rate went up to 85%; and if they lived in a renter household, the rate increased to 92%.
